II. ACCOUNTING CONVENTION AND FINANCIAL YEAR

Accounting convention

The accompanying financial statements, expressed in Vietnam Dong (VND), are prepared under the historical cost convention and in accordance with Vietnamese accounting standards, accounting regime and legal regulations relating to financial statement preparation and presentation,

The accompanying financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam,

Financial year

The Company's financial year begins on 01 January and ends on 31 December,
This report is established as of June 30, 2025 for information disclosure purposes,

III, ACCOUNTING STANDARDS AND SYSTEM APPLIED

The Company's Directors ensure that it has complied with the requirements of Vietnamese Accounting Standards and the Vietnamese Enterprise Accounting System issued in accordance with Circular No, 200/2014/TT-BTC ("Circular 200") dated December 22, 2014 of the Ministry of Finance, Circular No, 53/2016/TT-BTC dated March 21, 2016 of the Ministry of Finance on amending and supplementing a number of articles of Circular No, 200/2014/TT- BTC as well as Circulars guiding the implementation of accounting standards of the Ministry of Finance in the preparation and presentation of financial statements,

IV, SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies, which have been adopted by the Company in the preparation of these financial statements, are as follows:

Estimates

The preparation of financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting requires the Board of General Directors to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the financial year (reporting period). Although these accounting estimates are based on the Board of General Directors' best knowledge, actual results may differ from those estimates,

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments with original maturity of less than 3 months that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value,

Financial Investments

Investments in associates

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies,

Interests in subsidiaries, joint ventures and associates are initially recognised at cost. The Company's share of the net profit of the investee after acquisition is recognised in the income statement. Other distributions received other than such profit share are deducted from the cost of the investments as recoverable amounts,

Receivables

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less provision for doubtful debts,

Provision for doubtful debts is made for receivables that are overdue under the economic contract, a loan agreement, a contractual commitment or a promissory note and for receivables that are not due but difficult to be recovered, Accordingly, the provision for doubtful debts is based on the original repayment period under the original purchase contract, without regard to the extension of the debt between the parties and the case where the debts are not due but the debtor is in bankruptcy, in dissolution, or missing and making fleeing,

Inventories

Inventories are stated at the lower of cost and net realisable value, Cost comprises direct materials and where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition, Cost is calculated using the weighted average method, Net realisable value represents the estimated selling price less all estimated costs to completion and costs to be incurred in marketing, selling and distribution,

The evaluation of necessary provision for inventory obsolescence follows current prevailing accounting regulations which allow provisions to be made for obsolete, damaged, or sub-standard inventories and for those which have costs higher than net realisable values as at the balance sheet date,

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation,

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working condition and location for their intended use,

The costs of self-constructed or manufactured assets are the actual construction or manufacturing cost plus installation and test running costs, Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

	<u>Year</u>
Buildings, structures	06 – 20
Machinery and equipment	05 – 10
Transportation and transmission vehicles	07 – 10
Equipment and management tools	03 – 05
Perennial plants, animals working for products	06 – 40
Other tangible fixed assets	03 – 05

Construction in progress

Properties in the course of construction for production, rental or administrative purposes, or for other purposes, are carried at cost, Cost includes professional fees, and for qualifying assets, borrowing costs dealt with in accordance with the Company's accounting policy, Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use,

Prepaid expenses

Prepaid expenses include actual expenses incurred but related to the business results of many accounting periods. Prepaid expenses include the value of exported tools, instruments and components, expenses that are considered to be likely to bring future economic benefits to the Company. These expenses are capitalized as prepayments and amortized to the income statement using the straight-line method in accordance with current accounting regulations.

Revenue recognition

Revenue from the sale of goods is recognised when all five (5) following conditions are satisfied:

- (a) the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (b) the Company retains neither continuing managerial involvement to the degree usually associated with; ownership nor effective control over the goods sold;
- (c) the amount of revenue can be measured reliably;
- (d) it is probable that the economic benefits associated with the transaction will flow to the Company; and
- (e) the costs incurred or to be incurred in respect of the transaction can be measured reliably,

Interest income is accrued on a time basis, by reference to the principal outstanding and at the applicable interest rate unless the interest receivable is uncertain,

Cost of goods sold

Including the cost of finished products and services sold during the year, recorded in accordance with the revenue consumed during the year,

For direct material costs consumed in excess of the normal level, labor costs, fixed general production costs not allocated to the value of products in stock, they are recorded immediately in the cost of goods sold (after deducting compensation, if any) even when the products and goods have not been determined to be consumed,

Financial activity expenses

Financial expenses reflect expenses or losses related to financial investment activities: loan interest expenses, deferred purchase interest, interest on financial leased assets, payment discounts for buyers, expenses and losses from liquidation, transfer of investments, provisions for devaluation of trading securities, provisions for investment losses in other entities, losses arising from selling foreign currencies, exchange rate losses and other investment activity expenses,

Selling expenses, business management expenses

Selling expenses reflect actual expenses incurred in the process of selling products, goods, and providing services,

Business management expenses reflect actual expenses incurred related to the general management of the business,

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax,

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that

are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are never taxable or deductible,

Deferred tax is recognized on significant differences between carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using balance sheet liability method. Deferred tax liabilities are generally recognized for all temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised,

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset recognized. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity,

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis,

The recognition of corporate income tax is based on current tax regulations. However, these regulations vary from time to time and the final recognition of corporate income tax depends on the results of the examination by the tax authorities,

Other taxes are paid in accordance with the prevailing tax laws in Vietnam,

Earnings per share

Basic earnings per share is calculated by dividing the profit or loss after tax allocated to the shareholders owning common shares of the Company (after adjusting for the deduction of welfare and reward fund) by the weighted average number of ordinary shares in circulation during the year,

Diluted earnings per share is calculated by dividing the profit (or loss) after tax allocated to shareholders owning the common shares of the Company (after adjusting for dividends of convertible preferred shares) by the weighted average number of ordinary shares in circulation during the year and the weighted average number of ordinary shares which will be issued in case potential impaired ordinary shares are converted into common shares,

Related parties

Considered as related parties are enterprises - including parent companies, subsidiaries, affiliated companies - individuals who, directly or indirectly through one or more intermediaries, have control over the Company or under the control of the Company, or under common control with the Company. Affiliates, individuals who directly or indirectly hold voting rights of the Company and have significant influence over the Company, key management positions such as directors, officers of the Company, close family members of these individuals or affiliated parties or companies affiliated with these individuals are also considered related parties,

In considering each related party relationship, attention is given to the substance of the relationship, not the legal form,
